EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, line 6, "beam" has been changed to ---first---.

Claim 13, page 22, line 1, "an" has been changed to ---a---.

Claim 21, line 14, "a width that tapers" has been changed to ---a third width that tapers---.

Claim 29, page 25, line 7, "a width that tapers" has been changed to ---a third width that tapers---.

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest an optoelectronic device comprising, in combination with the remaining features of the claims, a laser generator adapted to emit radiation that is focused on the source electrode to stimulate emission of rapidly varying electrical current from the source electrode; an impedance matching device coupled to the source lead and the collector lead or incorporated in them; and a connector coupled to the impedance matching device, the connector adapted to couple to a second impedance, wherein the impedance matching device is adapted to match the first impedance to the second impedance (claim 1); a center conductor and a substantially-cylindrical outer

conductor forming the collector electrode, the outer conductor being disposed around the center conductor in a coaxial fashion, the outer conductor having a radius smaller than a wavelength of the rapidly varying electrical current from the source electrode (claim 13); a first stripline having a first end and a second end, the first stripline having a width that tapers to a point at the first end, wherein the point forms the source electrode having the first impedance, and wherein the first stripline has a second width at the second end that is coupled to the connector that is adapted to couple to the second impedance, and a second stripline forming the collector electrode, the second stripline having a third end and a fourth end, the second stripline having a third width that tapers to a point at the third end and having a fourth width at the fourth end (claim 21), and a third stripline (claim 29).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Vu whose telephone number is (571) 272-1831.
